- Laser and motion sensor
- Liquid motor pump
- Connection records
- Antibacterial fluid box
- Liquid drain box
- Sound and speaker system
- Connecting hoses
- Timer electronic circuit
- 5 liters of antibacterial liquid
- 10,000 times liquid spray for 5 liters of liquid

Our products are guaranteed for 2 years.

HAND DISINFECTION DISPENSER & SANITISER

Covid-19 has highlighted the need for better hand hygiene in the UK, Europe and worldwide to prevent the spread of infectious diseases. This need is even greater in public places where the transmission risk is higher.

Cleaning our hands regularly in public places with certified anti-bacterial liquid will be an essential part of transitioning from restricted movement to a relaxing of current restrictions without causing a massive surge in new cases.

- ✓ This machine is an automatic, 100% contactless, hand sanitiser dispensing machine with integrated display.
- ✓ The large physical form factor also means that it can hold a large volume of hand sanitiser so the machine will only require a refill after 10,000 uses.
- ✓ Alongside providing 70% water saving, after using hands will remain disinfected % 99,99 of viruses and germs will be killed and hands will remain disinfected.

- ✓ A Healthy Life is In your Hands
- ✓ Healthier future with cleaner Hands
- ✓ Please clean your Hands
